Quantitative Skills Courses

GVPT and GVPT-IR (BA) students must fulfill the Quantitative Skills requirement with a course from the list below. Students in the GVPT- BA (non-IR) program may also choose a second course from this list to fulfill the Additional Skills requirement. GVPT-IR students must take an Intermediate Foreign Language course to fulfill their Additional Skills requirement.

Students may not use their math benchmark course to fulfill any of the skills requirements. GVPT courses used to satisfy a skills requirement may not also fulfill a GVPT course of choice.

Many of these courses have prerequisites and other restrictions. It is the student's responsibility to proactively review course descriptions to confirm courses they register for are not duplicates of courses they have already completed.
