GVPT Methods Courses

Students pursuing the Bachelor of Science must fulfill the GVPT Methods and GVPT Quantitative Methods requirements with approved courses. GVPT students not in the Bachelor of Science program should refer to the approved Quantitative and Additional Skills list for BA and BA in International Relations majors.

GVPT courses used to satisfy these requirements may not also fulfill a GVPT course of choice.

The GVPT Methods and GVPT Quantitative Methods course lists are identical other than the two bolded courses below.

Many of these courses have prerequisites and other restrictions. Please review the course description on the Schedule of Classes for up-to-date information.

It is the student’s responsibility to proactively review course descriptions on the Schedule of Classes to confirm courses they are registering for are not considered duplicates of courses they have already completed.
